

PUBLIC SERVICE & SITE HANDBOOK

Detailed public dossiers, distinct regional services and accountable processes.
Concept edition 03.

**A COMMON FUTURE.
A LOCAL HOME.**

THE INSTITUTION BEHIND THE PUBLIC SERVICE

PRACTICE

Existing pages now carry detailed regional government profiles, institutional powers, functional office work, evidence tests and illustrative cases. Powers and organisation pages name accountable roles. Service hubs distinguish households, companies and cooperatives, research and civic organisations, and public administrations. On-page contents links make longer explanations usable. The network remains linked through stable relative HTML paths and works offline.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open START-HERE.html. Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

IDENTITY AND TYPOGRAPHY

PRACTICE

The supplied SSU, EOC and EMO marks and exact original Union wordmark are retained. Akira Expanded Demo by Typologic is a researched visual match, not a confirmed identification; its demo permits personal noncommercial use. Source Sans 3 supports reading and controls; Source Serif 4 supports policy headings and record extracts in the HTML. Both Adobe families and their SIL Open Font Licences are included locally. These updated forms and handbook use Source Sans 3 for prose. Black belongs to the Union; blue belongs only to Earth-related institutions.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open START-HERE.html. Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

A REQUEST WITH AN ACCOUNTABLE OWNER

PRACTICE

A requester states capacity, scope, location, safeguards and evidence references. The receiving office records the local intake. The specialist lead remains responsible for its own finding. A cross-institutional referral does not silently transfer powers or responsibilities.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open [START-HERE.html](#). Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

EVIDENCE, OUTCOMES AND CONTINUING DUTIES

PRACTICE

Each service explains what its evidence must establish, the work behind its assessment, possible results and the duties after a finding. Eligibility follows the requested act rather than a generic portfolio label: a policyholder uses the insurance route, a laboratory uses bounded standards accreditation, and a receiving administration explicitly accepts an institutional handoff. Missing documents, representation needs and communication outages have alternative routes. Restricted source custody and a reasoned public explanation remain distinct records.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open [START-HERE.html](#). Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

TIME ACROSS A DELAYED NETWORK

PRACTICE

Receipt and completeness are distinct events. Bounded local delegations list non-waivable rights, expiry triggers and later reconciliation duties. The portal does not invent numeric service deadlines, population figures, live notices or instantaneous command across the system.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open START-HERE.html. Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

FORMS AND LOCAL RECORDS

PRACTICE

Three PDF packets provide 100 two-page services: 58 citizen/operator forms, 18 place-specific forms and 24 institutional cooperation forms. Named AcroForm fields preserve the editable record. The HTML case workspace saves drafts, receipts, evidence references and simulations on the current browser, with JSON export/import.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open [START-HERE.html](#). Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

CONTACTS AND INTERINSTITUTIONAL COOPERATION

PRACTICE

Each entity publishes four contact roles: public assistance, case intake, institutional cooperation and independent review. Fictional .example addresses identify the intended routing. No messages are sent. Cooperation records competence, evidence version, scope, reserved powers and receiving acceptance.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open [START-HERE.html](#). Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

BOUNDARIES OF THE FICTIONAL EDITION

PRACTICE

No real permits, emergency dispatch, authentication or governmental institutions are created. The architecture is original worldbuilding. Planetary engineering, Venus aerial communities and distant mission zones remain conditional future concepts. No Sun or gas-giant surface municipalities are assumed.

THE RESPONSIBLE RECORD

Record the source evidence, competent powers, reasoned finding, conditions, accountable role, review route and follow-up owner. Public policy records and private personal cases use different access controls.

CONNECTED HTML ENTRY

Open [START-HERE.html](#). Use Worlds & habitats for local administration, Institutions for the full hierarchy, Public services for evidence and procedures, and Institutional cooperation for competent handoffs.

SOLAR INFRASTRUCTURE

PUBLIC PROMISE

Power for many worlds. Stewardship of one star.

COLLECTION CORRIDORS

Separate collection, beam transit and receiving-site permissions.

SPACE WEATHER SERVICE

Publish local shutdown triggers and independent forecast confidence.

POWER COMMONS

Disclose allocation rules, outages and receiving-community benefit agreements.

DECOMMISSIONING BONDS

Name the owner of retired infrastructure before approval.

LOCAL SAFEGUARD

No inhabited solar surface is assumed. Receiving communities may refuse a beam corridor.

MERCURY OPERATIONS

PUBLIC PROMISE

Thermal limits. Industrial clarity.

TERMINATOR INDUSTRY

Track mobile plants and prevent conflicting relocation routes.

POLAR RESERVES

Distinguish water custody from ownership of the planet.

WORKER REFUGE

Maintain shelter access independent of employment.

LAUNCH INTERFACES

Coordinate launch exclusion areas with nearby communities.

LOCAL SAFEGUARD

A relocation route must preserve accessible refuge for contractors and visiting crews.

VENUS AERIAL COMMUNITIES

PUBLIC PROMISE

A civic home above the clouds.

AERIAL DISTRICT REGISTER

Describe inhabited pressure envelopes and mobile civic addresses.

ATMOSPHERIC CORRIDORS

Reserve three-dimensional routes and drift contingencies.

MATERIALS INTEGRITY

Require inspection histories for corrosive environments.

CLOUD OBSERVATORIES

Keep public weather records separate from operator forecasts.

LOCAL SAFEGUARD

Aerial settlement is a conditional future concept. Surface missions require separate robotic access review.

EARTH PUBLIC SERVICES

PUBLIC PROMISE

The home world. Connected to every world.

NATIONS AND COMMUNITIES

Union coordination respects existing democratic jurisdictions.

ORBIT AND GATEWAYS

Earth Orbit Command coordinates traffic and departure interfaces.

HOME-WORLD RESTORATION

Publish ecological recovery programmes and land stewardship agreements.

RETURNING RESIDENTS

Coordinate medical, civic and benefit continuity after off-world residence.

LOCAL SAFEGUARD

Earth Orbit Command owns traffic coordination; Earth civic administrations own residency.

LUNAR PUBLIC ADMINISTRATION

PUBLIC PROMISE

One Moon. Many communities.

POLAR WATER COMMONS

Protect emergency reserves before allocating industrial extraction.

FAR SIDE QUIET ZONES

Publish radio-quiet limits and independent observatory objections.

SETTLEMENT CHARTERS

Keep local civic government distinct from Earth-Moon transport operations.

DUST AND HERITAGE

Review transport plumes near habitat intakes and protected landing sites.

LOCAL SAFEGUARD

Lunar autonomy is separate from the blue Earth-Moon Operations identity. Shared-route cases can be referred to EMO.

MARS CIVIC ADMINISTRATION

PUBLIC PROMISE

Build a home. Keep a future open.

SETTLEMENT AND RESIDENCY

Connect arrival planning, civil status and habitat capacity.

PHOBOS AND DEIMOS PORTS

Separate moon gateway permits from surface construction.

WATER AND REGOLITH

Publish allocation compacts and trace contaminated material.

PLANETARY FUTURES

Run engineering trials only after independent protection review and public consent.

LOCAL SAFEGUARD

No terraforming approval is implied by a construction permit. A contested protection finding suspends the experiment branch.

ASTEROID COMMONWEALTH

PUBLIC PROMISE

Small worlds. Shared rights.

COOPERATIVE CHARTERS

Protect member votes, exit rights and public service access.

CERES WATER EXCHANGE

Separate cargo custody, reserves and local allocation.

SMALL-BODY NAVIGATION

Publish changing local approach rules and tether exclusion zones.

RESOURCE ACCOUNTABILITY

Follow extracted material through processing, transfer and reclamation.

LOCAL SAFEGUARD

Employers cannot condition air, water or civic exit on repayment of private debt.

JOVIAN SYSTEM

PUBLIC PROMISE

Four major moons. Distinct duties.

CALLISTO CIVIC GATEWAY

Coordinate habitable infrastructure and radiation-managed transfers.

GANYMEDE SERVICES

Publish utility and settlement interfaces with protected geology records.

EUROPA PROTECTED REGISTER

Keep research permissions independent of commercial extraction.

IO ROBOTIC OPERATIONS

Route volcanic monitoring and hardware loss reporting without presumed residents.

LOCAL SAFEGUARD

An access permit does not authorize ocean penetration or sample release. These require a separate BIO determination.

SATURNIAN SYSTEM

PUBLIC PROMISE

Moon communities. Protected oceans.

TITAN COMMUNITY SERVICES

Coordinate sealed habitats, mobility and hydrocarbon safety.

ENCELADUS PROTECTION

Treat plume sampling and ice penetration as separate activities.

RING STEWARDSHIP

Keep approach exclusion areas and debris accountability public.

MOON LOGISTICS COMMONS

Publish shared storage, transfer and rescue mutual-aid compacts.

LOCAL SAFEGUARD

Plume samples remain contained throughout transfer; collection does not confer access to subsurface habitats.

URANIAN MOON NETWORK

PUBLIC PROMISE

Public services across long seasons.

SEASONAL UTILITY RESERVES

Audit dependencies across a long seasonal cycle.

MOON COUNCIL COMPACTS

Connect Titania, Oberon and smaller moon delegations.

REPAIR AND FABRICATION

Maintain local spare-part certification and public repair capacity.

REMOTE LEARNING NETWORK

Ensure access to curricula without a live inner-system connection.

LOCAL SAFEGUARD

A shared reserve cannot erase the receiving moon council's emergency decision powers.

NEPTUNIAN ADMINISTRATION

PUBLIC PROMISE

Distant government. Local decisions.

TRITON CIVIC CONTINUITY

Define what a local council may decide while links are delayed.

TRANSFER AND REFUGE

Publish shelter capacity and vessel-to-habitat handoffs.

NEREID MISSION REGISTRY

Use mission service plans where no residential population is established.

DELAYED DECISIONS REGISTER

Keep receipts, effective times and review histories independently mirrored.

LOCAL SAFEGUARD

Delay is not permission to remove essential rights. Delegations must state what may never be waived.

PLUTO[?]CHARON PUBLIC COMPACT

PUBLIC PROMISE

A binary system. A shared civic compact.

BINARY CIVIC COMPACT

Publish each community's consent to shared institutions.

ICE-WORLD UTILITIES

Record reserve stewardship and heating dependencies.

SMALL MOON MISSIONS

Keep robotic mission services separate from residential entitlements.

JOINT ARCHIVE

Mirror public decisions across Pluto and Charon custodians.

LOCAL SAFEGUARD

Each council ratifies its obligations separately; shared infrastructure does not merge citizenship records automatically.

KUIPER COMMUNITIES

PUBLIC PROMISE

A distributed public realm.

MOBILE PUBLIC OFFICES

Bring records, benefits and accessible advice to dispersed habitats.

HABITAT MUTUAL AID

Maintain locally held agreements for repair and medical transfers.

REMOTE QUALIFICATION ROUTES

Recognize supervised study and apprenticeships across delayed links.

COLD-CHAIN COMMONS

Publish custody transfers without assuming continuous supervision from Earth.

LOCAL SAFEGUARD

A travelling office may help reconcile a record; it cannot silently overwrite an independent local register.

SCATTERED-DISK MISSIONS

PUBLIC PROMISE

Sparse networks. Explicit responsibility.

ERIS AND DYSNOMIA REGISTER

Maintain paired mission records and local contact custody.

SEDNA RESEARCH STEWARDSHIP

Record conditional mission scope and scientific restraint.

SUCCESSOR RESPONSIBILITY

Name who inherits a mission's obligations after its sponsor closes.

REMOTE EVIDENCE ARCHIVE

Preserve raw measurements and confidence without invented real-time control.

LOCAL SAFEGUARD

A sponsor's dissolution does not cancel crew support, archive custody or contamination obligations.

COMETARY AND OORT MISSIONS

PUBLIC PROMISE

Moving missions. Persistent duties.

MOVING-TARGET JURISDICTION

Identify mission custody without claims to an entire comet.

ICE RECOVERY LEDGER

Trace recovered material and emergency reserve duties.

LONG-PERIOD SCIENCE

Publish uncertain trajectories and independent observation requests.

OORT SURVEY STEWARDSHIP

Treat the distant reservoir as a speculative mission zone.

LOCAL SAFEGUARD

Target uncertainty is recorded explicitly. A recovery plan must be revised when navigation confidence falls below its own declared limit.

FREE-SPACE HABITATS

PUBLIC PROMISE

Constructed places. Full civic lives.

HABITAT DEMOCRACY

Protect civic participation regardless of property ownership.

ROTATION AND DOCKING

Separate moving structures from visitor access and utility governance.

AIR AND HOUSING COMMONS

Publish essential access covenants and operator insolvency plans.

MOBILE CIVIC ADDRESSES

Maintain stable identities while the habitat changes its operating location.

LOCAL SAFEGUARD

Owning the structure does not confer ownership of residents' rights. Earth-associated Lagrange service referrals use Earth blue only at the receiving Earth institution.

TROJAN COMMUNITY COUNCILS

PUBLIC PROMISE

Two swarms. A common public voice.

LEADING-SWARM COUNCILS

Maintain local representation and independent service priorities.

TRAILING-SWARM COUNCILS

Publish reciprocal compacts without merging local charters.

CO-ORBITAL NAVIGATION

Review transfer windows and approach confidence separately.

FREIGHT SOLIDARITY

Share critical supplies without giving a single operator veto power.

LOCAL SAFEGUARD

A freight compact cannot grant exclusive control over swarm gateways or emergency supplies.

INTERPLANETARY PUBLIC CORRIDORS

PUBLIC PROMISE

Rights travel with you.

PASSENGER RIGHTS IN TRANSIT

Keep support, accommodation and complaint routes accessible onboard.

CARGO CUSTODY HANDOFFS

Record responsibility at each transfer rather than only departure.

RESCUE MUTUAL AID

Separate welfare coordination from actual incident command.

ROUTE GOVERNANCE

Publish passenger, operator and gateway duties through each jurisdiction.

LOCAL SAFEGUARD

A traveller's civic status is not replaced by the transit vessel's registration jurisdiction.
